

Twilight Products

By Jim Carter (edited by LEC)

The company name Twilight did not come from the mystical time before the dawn. It came from the abbreviation T.W.L.T. that stands for "The World's Largest Test". Originally I made all the Twilight Products for myself. For over thirty years I have attempted to prove to the world, one person at a time, that these products could and should be their friends. The world's largest test is designed so that everyone can have his or her own experience and from this experience reach his or her own conclusion. The products offered by Twilight America intentionally come with minimal instructions. I would like your own experience and intuition to direct you in their use.

Many of the Twilight Products are offered without designed-in obsolescence and in forms that provide endless potential use. The first step in recovery from destructive aging has to be returning the liquids of the body to the "thin" character of youth. This, plus removing the stress of life so that a person can rest, is probably all that's required for rejuvenation.

The Fountain of Youth was a pool, a spring or a "fountain" of revitalizing, living waters that was readily absorbed by the skin of the body. When we are young the waters of our bodies are thin and the chemistry of our systems is active and effective. With time our waters change, absorbing the energies of our world and becoming thickened by these energies. Many researchers recognize the phenomenon of varying thickness of water. Well-known proofs include water clustering and homeopathy.

We can all agree that without water there would be no life on Earth. A logical mind should recognize that large water molecules and ever-bigger compounded water molecules are going to find interfacing with the environmental waters difficult. Without a good interface to other water of the world your body becomes an isolated stagnant pool. To regain one's youth, one must begin by restoring the vitality to one's body fluids, so that chemical reactions and interchange with outside waters are optimal. It is in this light that I wish to introduce you to the waters of Twilight.

Please bear with me if I use words that are not totally familiar or seem not to fit the occasion. Love, for instance, is not a very scientific term even though it is the physical force of Love that is the root of all that exists in this world, including life. Remarkably, we only know this force by our emotional encounters with high levels of it. Love, both as an emotion and as a "real force" does in fact make the world go round and these products are an application of this force. Other names have been used in attempts to describe this force, or its effects: orgone, chi, prana, The Force, grace, etc.

Welcome to the 21st Century!

I will begin simply by stating that the science of our day has several shortfalls: We have entirely missed the force that initiates and animates life, referring to it only as "the mystery of life".

Scientists have developed testing procedures that reduce all the subtle forms of water into common water and declare, "All water is the same. H₂O is H₂O, and that's all there is to it." I disagree.

Love is the sensation caused by the physical force that is responsible for all life in our world, and there are three principal forms of water found in that life: common water, dew, and the

mysterious liquid that is found in the fluids of living organisms, that I call Magic Water and others call plasma.

Enhancing the physical force of Love in ordinary materials makes them Twilight Products. The Bath Crystals are convenient and effective for those who take baths. The Dollop Of Love blends right into any family's lifestyle. Magic Oil is a great food enhancer and carries vital magnesium into the digestive tract.

Precious Prill Beads

Magnesium Oxide chards

PRECIOUS PRILLS are receivers of the physical force of Love. Precious Prills both accumulate the ambient Love of the world and receive this force from designed and enhanced sources. Life began with water and if it is to be restored, good water must surely be the place to begin.

Placing common water in contact with Precious Prills causes a remarkable thinning of that water. The resultant liquid is known in nature as dew, a liquid much thinner than common water. Skin tissue absorbs it while it repels common water. This happens in the moist internal tissue of the digestive tract or the somewhat drier tissue (skin) found on the outside of the body. Living cells that are properly filled with liquid have excellent dynamics, while cells that are under-inflated or perhaps even worse, over-inflated, are extremely vulnerable, both to absorption of toxic energies and to attack from predators and parasites. Proper liquid stasis relates directly to cellular longevity and cellular longevity relates directly to longevity itself.

Even though the alteration of physical characteristics of water by Precious Prills does seem to render this liquid far cleaner than its parent "common water", Precious Prills are not a water purification device. Because this liquid doesn't support lower life forms such as germs, bacteria or fungi, it can be considered an antiseptic.

The water made from common water placed in contact with Precious Prills is a wonderful moisturizing liquid. Most pain in our bodies can be traced to shortage of moisture, to dehydration. Prill water has the power to reduce pain and thus reduce the stress caused by it. Precious Prill water is also supportive of formation of beneficial compounds that support good "young" chemistry.

Place the package of Prills in a one gallon glass container and fill it with preferably filtered drinking water. After 24 hours incubation, three quarts can be removed for use and the container refilled. From this point forward the Prills will process up to 3 quarts per hour. Precious Prill water should only be made in glass containers, or glazed ceramic. After it is made, it can be transferred into good plastic containers safely.

Precious Prill water is Dew, the living liquid both plants and people use to produce more complex building blocks of life. Plants change common water into dew as this liquid is found in fruits and seeds. It is the most appropriate moisturizer for all living cells and the precursor to the formation of Magic Water.

Restoring the dew of our planet is restoring its future.

When you make and use Precious Prill water, while enjoying life a bit more, you become one of the active environmentalists on this planet. Precious Prills, the Twilight Laundry Appliance and the Shower Converter are all powerful environment-restoring tools.

1. Precious Prills are used to make excellent moisturizing water, often directly from tap supplies. Some waters may require pre-treatment.
2. You can make up to three quarts per hour from your Prill Water Factory, which is simply a glass or ceramic jar that holds four quarts with one package of Precious Prills.
3. Precious Prills were designed to make water wetter and thus a better moisturizing liquid. Even though the effect does have a remarkable cleansing effect on water, Precious Prills are not intended to be a cleaning or filtering device.
4. When you receive your Precious Prills, place them in a clean glass or ceramic jar and add four quarts or four litres of quality water. Precious Prills do not require washing and the fine white dust improves their action and is totally safe to ingest.
5. There are many different grades of Precious Prills. The ones sold for the purpose of making drinking water are designed to produce water with a great taste. The version of Precious Prills used in the Laundry Appliance and the Shower Converter produce water that may taste unpleasant to human palate.

Personal Water Set

Ceramic Bisk with Catalytic Hydrous Silicon crystals

The personal water set is designed to allow its user to produce varying intensities of water. Drop one piece in a pint or quart water bottle for water similar to that produced with the Crystal Cupcake. Add up to four for a more intense effect. The increase in intensity of Life Force or Love in Water is intended to produce a better contact with the infinite.

Magic Water

Energetically altered Water

MAGIC WATER has no natural alternative. It is the liquid found in the fluid of living organisms and has the ability to take on many different characteristics. Magic Water is offered in bottles for spraying directly onto the skin. It can also be used as a catalyst with common water to give a result similar to Precious Prill water. Two or three sprays in a one-litre bottle are sufficient. It is an excellent moisturizer, and like Precious Prill water, it provides liquid phases that are critical to maintenance and regeneration of cells throughout the body.

Magic Water can also be made with the Crystal Cupcake, Personal Water Set, and Twilight Pearl. Magic Water produced from the Crystal Cupcake reaches maturity within 24 hours of contact with common or Prill water. It takes 40 days to produce four litres of Magic Water of the same quality that Twilight sells. Twilight Pearl has a much faster effect and changes the water almost instantly.

This world is almost entirely composed of water and its phases. Magic Water can vary its thickness from as thin as alcohol, to the thickness of common water, light oil, heavy oil, a wax all the way to a solid that resembles Nylon in both strength and appearance, and the body can direct it to take on any of these phases.

My theory is that in a perfect world an entire living system could easily be constructed of this single substance. I believe that this is the "First Water" referenced in the book of Genesis. Theories aside, there are two liquids at work in the human body. One is called water and the other is always referred to as a fluid. There is a billion dollar business built around the collection and distribution of the water found in blood, the "Blood Plasma".

Magic Water is the ultimate liquid of Twilight technology. Its natural degradation product is Precious Prill water or Dew. It is both a proper liquid for maintenance and regeneration of

living cells and a source of excellent moisture to fill them. Magic Water is the world's most wonderful transport vehicle. This water can be used to carry all manner of necessary ingredients into any living organism. This phenomenon has made the world's first topically and cellularly transmitted supplementation possible.

1. Chemicals in makeup dry out skin. Spray Magic Water on your face to revitalize and moisturize prior to applying makeup.
2. Chemicals, abrasions, bug bites and bee stings are all dehydrating events. Magic Water is a totally safe remedy for these and other injuries.
3. Magic Water is a wonderful remedy for dehydration. Dehydration has many levels, with burns being the most severe and dry skin being the least severe. Keep a bottle of Magic Water in the kitchen or anywhere you might experience burns. Spray it on and the pain will go away. If the pain returns, spray again. Itching or dry skin responds the same way.
4. Use Personal Water Set to make Magic Water from plain water in your portable containers. This is ideal for travel or when you are away from home.

Magic Oil

Energetically altered Magnesium Chloride from Sea Water

MAGIC OIL is the product of adding magnesium salt ($MgCl_2$) to Magic Water. In the beginning, the miracles of my work came entirely from this water. It soon became clear that unless the analytical experts of this world could find something besides "just water" in my preparations there would be no way to overcome the "snake oil" attitude they expressed. In order to give them something to find, I chose the safest substance known to man, magnesium chloride as an addition. I really did not know at the time that magnesium was "accepted as the keystone in cellular regeneration" or that it would be this substance that would become the scientific rock on which my work would stand.

Magnesium Chloride is the second most common substance in seawater after sodium chloride (common salt). It is proven safe by the millions of people who swim in the oceans of the world every year, with no adverse effects. When Magic Water, which is extremely bio-acceptable, is used as a transport vehicle for magnesium chloride, the result is the world's first successful cellular magnesium supplement. Cellular magnesium is a critical aspect of cellular regeneration, and when regeneration exceeds degeneration, Youthing inevitably results.

The first Magic Oil solutions were extremely crude, though very effective. The first test conducted on this liquid was actually overlooked because it caused a negative shift in the DHEA of the blood. We did not realize that this was because the cells were producing their own DHEA and therefore the blood stream no longer needed to carry DHEA from the adrenals and other glands to the locations where it works.

This test showed that 48 of 50 young, healthy people experienced a 40 to 60 percent increase in their blood DHEA levels after only eight baths with two ounces of Magic Oil placed in each bath. Later tests indicated that the two people who did not show the changes probably did not take the baths and that the differential of 40 to 60 percent was probably due to how many of the eight prescribed baths they actually did accomplish. Dr. C. Norman Shealy reported this in his 1998 book titled "Sacred Healing".

My work continues in various stages of development. The first Magic Oil was successful, yet we were able to improve on it. Over 100,000 people have experienced its benefits, without a side effect or contra-indication, other than detoxification. Regeneration can be too rapid for some people to handle.

The evolution of Magic Oil has focused on presenting it in a more convenient form rather than making it more effective. High costs of shipping water made the earlier versions expensive. I

believed that preventing destructive aging was preferable to "recovering from it". Persuading parents to give it to their children still seems difficult. Young parents seem to believe they are immortal and for some reason, until something devastating takes place, they believe the same of their children.

Some of my own children have consumed Magic Oil during pregnancy and the results are absolutely magnificent. During and after the pregnancy, the use of cellular magnesium supplement in the baby's baths resulted in increased strength, immunity and a wonderful state of peace. Perhaps having a week-old child sleeping through the night would motivate them.

Topically Everything

An Essential Extract of active components of Alfalfa and Kelp,
made with Magic Water and stabilized with Magic Oil

Topically Everything Ultra contains in added extract of active aspects of
Valerian Root, St. John's Wort and Golden Seal Root.

TOPICALLY EVERYTHING is the result of my research forced upon me by a serious infection that no conventional treatment was able to cure. Using the Magic Oil as a delivery mechanism for nutrients to penetrate into our tissue, and adding all known (and perhaps some unknown) amino acids, vitamins, minerals and nutrients extracted from alfalfa and kelp, I created the perfect tool for dealing with nutritional deficiencies. Adding extracts of Goldenseal, Valerian and St. John's Wort further enhances the product to give it anti-inflammatory, calming, and uplifting properties of the well known medicinal herbs.

1. Spray on any areas of physical discomfort and massage in.
2. Spray on your hands and rub it in to restore calm and uplifted mood, counteracting stress and overstimulation.

Totally unique – The World's first and only totally complete TOPICAL Vitamin, Mineral, and Amino Acid Source. Two sprays rubbed into the palms of the hands at least once a day are suggested. It can be used on any area of the body if special concerns exist. Avoid spraying into the eyes. There are over 300 individual applications in each bottle.

Bath Crystals

Energetically altered Magnesium Chloride from sea water

BATH CRYSTALS were originally a simple attempt to reduce the weight of the Magic Oil for shipping. It took far too much energy to dry out the Magnesium Chloride solutions, actually producing a product that cost more than was saved in shipping. I found that under the right circumstances Magic Oil would crystallize with all the Magic Water that was in it, still in place. This product answered the shipping expense question. It also contained the "wax form of Magic Water" which is probably the most restorative substance in the universe.

The Bath Crystals II are an improved formula with more components of sea water to deliver an even better approximation of the original ocean that gave rise to life on this planet.

3. Bath Crystals are the most cost effective way to restore cellular magnesium. A quarter cup a day for six consecutive days, for approximately 20 minutes in a bath is the best way to start. Twice a week after that seems optimal for most people.
4. Bathing allows the magnesium to spread throughout the body and to refresh the entire skin, calming your sympathetic nervous system.

5. If you don't get the results you are seeking, use more Bath Crystals or take more baths, and you probably will.
6. If baths are not possible, similar results can be accomplished with a footbath. Use the same quarter cup for six days to start.

Dollop of Love

Energetically altered Magnesium Chloride in a matrix of Cellosize

DOLLOP OF LOVE was a giant step forward in my product development. The package of DOL delivers as much magnesium as one would get from the best multiple vitamins in the world consumed over five years, by simply adding it to one's daily regime. The DOL mixes with shampoos, conditioners or body lotions in any desired proportion. It can also be used instead of any of these preparations. DOL II, or the Love Gel, uses the more complex sea salt formula used in the Bath Crystals II.

DOL allows including magnesium into children's normal bathing ritual. DOL is also a wonderful shaving gel. The agent that gave DOL her wonderful characteristics works to prevent toxic materials from being reabsorbed. The reabsorption of expelled toxic materials has long been suspected as the cause loosely known as the "detox phenomenon".

DOL also contains the laminar crystal, one of the keys to the success of my technology. This crystal not only makes it possible to use common water to make the DOL, but when it is left on the skin, it changes the water in your body into Magic Water. Dollop of Love is an excellent means of absorbing critically needed magnesium and essential moisture for cellular regeneration when used as a skin mask.

The body is intelligent and will only absorb quantities appropriate to optimal health. Include it in the bathing habits of your family and you will see wonders. Magnesium is said to be essential to the production of amino acids and in turn these substances are critical to proper endocrine system function. Magnesium soothes the nervous system providing deeper rest. Some of the top medical researchers in the world believe that low cellular magnesium accompanies all major disease. Perhaps "a DOL a day really keeps the doctor away". Anyone can use it as a hand lotion or shave with it.

1. DOL can be added to any shampoo, conditioner or lotion in any proportions.
2. A relatively small amount of shampoo will yield a tremendous amount of suds.
3. DOL can be used instead of shampoo, conditioner, or body lotion.
4. DOL is a wonderful shaving gel. It's safe for any area of the body.
5. DOL is a wonderful massage lotion.
6. Any application of DOL will provide vital magnesium to the body.
7. The body takes the magnesium to where it needs it most. Don't be surprised if the condition or concern does not instantly go away.
8. DOL benefits everyone.

Sea Powder (or Snow)

By analysis: Magnesium Oxide powder

SEA POWDER is a pure white substance extracted from seawater that provides a compound of Magnesium. It analyzes as a compound of magnesium, although to my knowledge no one has ever successfully produced magnesium metal from it. We include it because of its remarkable use as a tissue cleanser.

A paste made from Sea Powder and Precious Prill Water (or optimally Magic Water), will remove toxic substances from deep within the body, right through the skin, without disruption. This mixture is a great facial cleanser and is applied to the skin, to be left on until dried, then washed off.

1. A quarter teaspoon makes enough paste for a good facial.
2. A quarter teaspoon added to a bath will turn bath water into a wonderful moisturizer.

Solid Sunshine (Snow Crystals)

Hydrous Silicates from natural sources

SOLID SUNSHINE is the finest version of Laminar Crystals, the keystone of my work. A paste made from this powder is the perfect finish to the Sea Powder facial and it can be used on any area of the body. Rub the powder into the skin after it has dried and it will continue to change the common water of the tissue in that area into Magic Water so long as it is there.

1. A quarter teaspoon makes enough paste for a good facial.
2. A quarter teaspoon added to a bath will transform it into a type of Magic Water.
3. Solid Sunshine paste is a treatment for many "untreatable" conditions.
4. It works on dry, cracked feet.
5. It is a wonderful base for make-up

Goldenseal Drops

Golden Seal Root Extracted with Magic Water and stabilized with Magic Oil

GOLDENSEAL DROPS were the first herbal extract made with Magic Oil. The original purpose for this extract was to deal with Staph and Strep. Goldenseal has been used since it was discovered in the Americas some 500 years ago. It has been used to treat most every condition known to man. It tastes terrible and one had to take it until enough was absorbed to saturate the system for good results.

We compared Goldenseal Drops made with Magic Oil to the raw herb extracts they came from and found them to be more effective. Further tests showed the potency of the extract increased with time. When Goldenseal Drops are first made, they are a magnificent yellow colour and with time they turn green from what is obviously an increase in chlorophyll.

These little drops may provide benefits where everything else fails. Use them in the mouth to help with gum and teeth disorders. Topically they work great and, very diluted, they can even be used in the eyes. I have used Golden Seal on my dog to take care of ear infections and I am sure there are many other applications. Let your intuition be your guide. Of course you can also read of the many available articles for more ideas. A fine source of information about Goldenseal is "Back to Eden" by Jethro Kloss.

1. Take a few drops under the tongue to start. Whatever you swallow will assist the entire digestive system.
2. Brush your teeth and gums with Goldenseal to help with conditions of the mouth.
3. Applying Goldenseal Drops to any area of concern will help with the most problems.
4. A drop added to an ounce of Magic Water or Precious Prill Water makes an excellent eye wash.
5. Ten drops in an ounce of Magic Water or Precious Prill Water used as a nasal spray provided benefits when dealing with allergies.

The St John's Wort Drops

St. John's Wort extracted with Magic Water and stabilized with Magic Oil

ST. JOHN'S WORT DROPS have helped relieve nervous disorders and emotional imbalances. The Drops are much more effective than just the plain herb. St. John's Wort Drops are beneficial to treating depression in both men and women.

1. A single drop to a dropper full, under the tongue, is the best general application.
2. You can also apply it topically to the palms of the hands or soles of the feet.

Both Goldenseal and St. John's Drops are great magnesium sources in addition to delivering their herbal characteristics.

Laundry Appliance

Energetically altered Magnesium Oxide

THE LAUNDRY APPLIANCE was developed to save householders money as well as to purify the water of the world. This simple device works without detergents, bleach or fabric softeners to clean your laundry. It will drastically reduce water pollutants from chemical laundry products while restructuring your wash water.

We are committed to restoring the water on our planet. Each use of the Precious Prills results in a positive contribution. The Laundry Appliance is even more effective than Precious Prills. Anyone using Twilight products are proactive environmentalists.

1. Place it in your washing machine with each load of laundry.
2. Use it in your hot tub to energize the water.
3. Produces water that removes "covering agents" used in laundry detergents. When white clothes come from the wash the first time you use the Laundry Appliance they may look dirty. This is because the water of the wash has removed the "covering agents". This coating will fall off in the dryer or on a drying line.
4. The Appliance should be dried between uses.
5. If the Laundry Appliance is left in a Hot Tub, the water will wash out the hydrocarbons of the fabric cover, and the device will leak its active material.

Shower Converter

May contain one or more of the following: Magnesium Oxide, Hydrous Silicates in Ceramics or KDF

Like the Laundry Appliance, the Shower Converter I is a high volume producer of Precious Prill water that serves the person using it and dynamically improves the quality of the water in the home, community and the world. The Shower Converter II uses the technology of the laminar crystals to produce Magic Water, an even more effective structured water.

1. Simply install the device before your shower head.
2. Use it in your garden to water your plants and grow healthy and vigorous produce.
3. Use it to fill your pool or hot tub.

Crystal Cupcake

Hydrous Silicates in Ceramic Bisk

The Crystal Cupcake is a version of the stone from which Twilight technology was developed. It generates a field effect several feet in all directions. It is an enhancer for the human biological battery. It is approximately the fifth of the size and shape of a normal cupcake, but solid like a stone. Use it to make Magic Water, or carry it on your body, use it in the bath or spa, sleep with it close to you, and use it anywhere you desire.

Star Chamber Receiver

Hydrous Silicates in Ceramic Bisk and epoxy

The Twilight Products get their magic from a truly unique energy source that is transmitted to the Receiver. Even though all products will work very effectively without it, this little Receiver is designed to dynamically improve the connection. Placed in the center of your home, the accumulation of the Physical Force of Love will first form a circle of some 500 feet in diameter that irradiates from your home. The circle then turns into a bubble of Love that envelops your living environment and perhaps that of your neighbors. This not only improves the available life force in your habitat, it also protects you and your family from the negative energies of our failing environment.

Twilight Pearl

Hydrous Silicates in Ceramic Bisk with a natural chemically inert mineral catalyst

PERSONAL PEARL's shape was designed so that as you become more comfortable with making your own Super Spring-fresh water, you can use it in a multitude of effective ways. For now, just place it in any glass or ceramic container (one to five gallons) and fill with charcoal filtered tap water, well or spring water, or bottled water and begin experiencing the magic of Love Enrichment. This Pearl accumulates the Physical Force of Love, transfers it to the water, replacing the negative energies that were once there.

CHAKRA PEARLS connect you with an enhanced source of Love. They are designed to keep you connected to the Star Chamber Receiver when you are away from home, and they also dynamically improve it when you are in your home. Even though all the Twilight Products work very effectively without connecting with the Star Chamber Receiver, they are far more dynamic within its field.

HUMIDIFIER: What about the water you breathe and absorb through your skin? Much, if not most, of our body moisture comes from the humidity in the air. These wonderful little Pearls are designed for use in a humidifier to change the water into a marvellous cellular moisturizer. The treatment of moisture in the air of your home is equally as important as the treatment of drinking or bathing water. We suggest using cold air humidifiers, and placing one Pearl in each compartment. If you prefer the warm air type, just drop both Pearls in the water reservoir. The result is Vital Moisture that fills the air of your home and neutralized negative energies in the vapour in the air.

Crystal Pillow

Hydrous Silicates

The Crystal Pillow is made with the Laminar Crystal that has been used in the "Star Chamber Factory", as discussed in Dr. Shealy's book. Like the Solid Sunshine, this is a direct energy application that can be used over and over. Sleep on the Crystal Pillow for great, soothing rest.

Placed on any area of distress, it enhances the healing energy. Charge up your food to enhance its energy.

The Black Crystal Pillow is made with the black crystal used in the first phase of the Star Chamber experience. Use it at home to soften your tissues before your Twilight bath.

Message

I'm Jim Carter, the creator of Twilight and the Products sold by Twilight.

I have been asked time and time again, who I am and how I know, and what I know? The answer is simple, "I was given a message" and to the best of my ability I intend to deliver that message to the entire world. The rest is up to the people who hear it, whether it is heard by ear or intuition.

The message in a nutshell is that "destructive aging and the conditions of Dis-Ease that accompany it, no longer have to be part of life".

Love is the force and the source of all life. Mankind has always been given what he has needed, when he needed it, now is no exception. Man has chosen to ignore the answers to his prayers historically, and once again, he may or may not choose to accept this message. Here is yet another choice.

Improving the quality of waters of the world is my main purpose. Join me as one of the proactive environmentalists restoring the waters of the world through the use of these Twilight technologies.

- Jim Carter
