#### FILTER LIFE

**Hepa filters** typically last 5 years in regular use.

**Pre-filters** can be vacuumed from the exterior of the unit and should be changed every 12 months depending on use.

## FILTRATION SYSTEM

## UNIQUE FEATURES

- ▶ **PRESSURE SEAL** Airpura's unique pressure seal on the filter chamber ensures that all of the dirty air passes through the filters. Other systems allow leakage and do not achieve the 99.97% HEPA filtration rating.
- ▶ **FELT GASKETS** seal the filter chamber. Maximize filtration with no rubber off-gassing found with other filters.
- ▶ **BACKWARD CURVED MOTORIZED IMPELLER** eliminates the vibrations and noise associated with older motor and shaft set ups
- ▶ **VARIABLE SPEED MOTOR** lets you choose your ideal level of filtration.
- ▶ **MOTOR OUT OF THE AIR FLOW.** Most air purifiers blow the clean air over the motor and pick up fresh impurities
- ▶ **UNIMPEDED AIRFLOW** simple and direct internal airflow avoids the air turbulence, inefficiency and noise associated with more convoluted systems
- ▶ **SEPARATE ELECTRICAL PARTS CHAMBER** prevents any off gassing from capacitors, condensers or switches.
- ▶ **PERFORATED STEEL EXTERIOR** offers both a softer appearance and 360 degree air intake and distribution.
- ▶ **SEPARATELY CHANGEABLE FILTERS** The Hepa and carbon filters can be changed separately so you only change them when appropriate and save operating costs
