

# How To Use Prill Beads

## ***Precious Prills will help you to***

Super-Hydrate Your Body With Energized, Life-Force Enhanced Prill Water

Lasting many years, these small beads create water that is wonderfully moisturizing, and is absorbed immediately so that every cell (be it human, animal or plant) is properly hydrated. This is significant to healing, and to the maintenance of your health.

### **Enjoy Energized, Structured, Hexagonal Water!**

Precious Prill Water is super-hydrating, and is a far superior moisturizer compared to common water. The water will enhance your nutrient absorption as well as toxin elimination, and therefore improve your health. Treating your water with Prills improves the oxidation-reduction potential of your water – it will reduce the effect of damaging free radicals in your body. Prill Water raises the pH of your water to help you normalize the pH of your body. Prills also lower the surface tension of your water, improving its solvent capacity so that it may carry off toxins more effectively and deliver nutrients at an improved rate.

Every time some Prill Water goes down the drain, water restoration in the area begins. We can help clean the waters on Earth; one person, one septic tank, one sewer system, one river or lake at a time.

Drink Prill water for superior hydration, add it to your bath for rejuvenation. Use the Laundry Appliance or Bath Prills to make Prill water in your bath. Use ceramic Crystal Cupcakes in your hot tub.

Prill water is great in all situations:

Drink it or wash with it.

Clean or soak your fruits & vegetables to enhance flavor. Restore dried fruits. Spray on produce to extend freshness and for added moisture.

Spray & wipe counters and sinks to clean. Add to toilet tank (may damage plastic parts) to help clean septic and sewer systems.

Add to a humidifier, as breathing Prill Water vapor helps people with a sinus or lung problem. It repels black mould, and helps eliminate odors, creating a healthier indoor environment.

Hi everyone! Just wanted to share that after being on the Prill water for about 5 weeks, my constant thirst stopped, about a week ago. And I notice around this same time, that I no longer crave sweets and salty snacks. (This may be encouraging for some who have just started drinking Prill water). Both salts and sweets were very huge magnet for me in the past, but no more. In fact, I have some salty snack food in the cupboard and every time I look at it now, I think, "yuck". This is pretty significant for me, because in the past I was a big cheeto/dorito fan.

Use Prill Water to extend the life of cut flowers, and to improve the health of your plants and pets.

The water is remarkable. It alleviates stress and creates a sense of love and support within. It makes me feel much more peaceful. I can now cope with my two jobs and go to school all at the same time. I am in the process of recreating my life to "my" needs thanks Prills Water. Tutone (thx)

Precious Prills are made of magnesium oxide infused with Life Force, and have had their vibration adjusted in The Star Chamber Factory. They do not contribute minerals, but when in contact with common water, a very energized & life giving liquid is created. The Prills release Life Force they accumulated in the Star Chamber into the water they contact.

Precious Prills are not a water purification device. Because of its changed physical properties, Prill water does not support lower life forms such as germs, bacteria or fungi. Algae will grow in Prill Water that is left to sit in direct

sunlight.

## Directions For Use

Prior to initial use rinse the whole mesh bag in water to remove excess dust. Place the mesh bag of Prills in a one gallon class or glazed ceramic container, fill with drinking water and let sit for 12 to 24 hours to build up initial charge.

You may pour off up to three quarters of the water volume to use as needed. Refill with drinking water. The charge will rebuild within one hour. You can repeat this for several years, many times each day.

If the bag of Prills will not fit through the opening of your container, remove some of the beads from the bag or pour the Prills in loose. Approximately 2 to 3 oz of Prills will treat one gallon of water. Add more bags in larger containers.

If the water is charged for more than a week, it may taste metallic. It is still safe to drink, but may produce a strong energizing effect. You may discard the water and start the charging process again.

Refrigeration will slow down the charging process that is powered by natural water molecule movement. Processed water may be refrigerated in a separate container.

Drink & cook with it, bathe in it, and feed it to pets or plants. Because Prill water detoxifies your body, it is advisable to start with small amounts, and build up to consuming 2 quarts (or more) a day.

I am extremely happy with the products I've been getting from you. I can only say that Jim Carter must have been a genius and his death was a loss to the world. After about 2 weeks on Prill Water and about a week on Magic Water, I suddenly noticed that my vision cleared up noticeably. It was like a gray film was lifted off my vision. Everything is brighter. My sense of smell also suddenly improved at the same time. It was not a gradual improvement, but a quantum leap. Very interesting. A definite rejuvenation effect! And fast! Sincerely, Marron

The Prills work in any water. The better the water quality that you begin with, the better your resulting Prill Water will be. While you can use regular tap water, it is preferable to use filtered water for drinking. Your Prills will last much longer that way.

### **For Consumption**

Place the bag of Precious Prills in a glass or glazed ceramic container (do not use metal or soft plastic) and fill with about a gallon of water. After an initial charging period of 12 to 24 hours it is ready for use. Prill Water may be stored in a hard plastic container, but it will decompose soft plastic.

When left for very long period of time, Prill water can overcharge, creating a metallic taste for some. Your taste tolerance will increase with use.

### **For Bathing**

Place Bath Prills (a 2 lbs bag) in a bathtub, then fill with hot tap water for a rejuvenating soak. When drained, the waste water goes into the process of transforming the water in your area. You can also use the Laundry Appliance to make Prill water in your bath or hot tub.

### **In a Humidifier**

Inhaling Prill Water vapor helps people with sinus or lung problems. Prill water repels black mould, and helps eliminate odors, creating a healthier indoor environment. Crystal Pearls or Cupcake will be even more effective in this application.

### **Other Uses**

Clean and/or marinate fruits & vegetables to enhance flavor, dry, raw or juiced.

Spray bottom of frying pan and/or top of the food when cooking, for added moisture when desired.

Spray & wipe counters and sinks to clean.

In the toilet tank to help clean septic systems (may corrode plastic or metal parts).

Spray on hands & face, in mouth and on tooth brush to clean.

While traveling, spray is handy for washing hands before & after snacks.

Great for cleaning baby's bottom at diaper changes.

Place cut flowers in the Prill water to extend their life.

I received cut flowers from my daughter two days before Christmas. Like always, they began to die in about five days. I decided to pour off the water and replace it with Precious Prill Water. I wish I had thought of it sooner. It is hard to believe but my flowers are lovely even now, five weeks later. I called the Florist who delivered them and asked if she would like to deliver cut flowers that would last five weeks? She thought I was kidding. When I assured her I was serious, she came over and brought her camera.

She told me how her Father suffers all the time from the same kind of spine problem I had. I gave her two gallons of Prill Water to get her started. She is going to use it on her cut flowers and her plants until her Prills come.

After 42 days in Prill water, I set them out in my outside flower garden. They have been growing now for almost three weeks. A miracle?

See Dr. Masaru Emoto's research demonstrating how vibration affects water. Also read about the work of Dr. Batmanghelidj, and his books on the importance of water in our bodies.

**Note:**

Over time, some people have seen their Precious Prills change color. To restore them to clear & white, dunk the bag of Prills in one cup of Hydrogen Peroxide 3% (pharmacy grade), rinse thoroughly, and start over.

The Prills may become discolored by minerals contained in the water you use. We have seen grey, beige, orange, blue and green, depending on the water source (calcium, magnesium, iron, copper, etc.) The color does not affect the functioning of the Prills. The algae growth is stronger when the Prill Water container is exposed to sunlight.

## **Healing by Hydration with Prill Water**

Most of the pain in our bodies can easily be tracked to a shortage of moisture, called "dehydration". Precious Prills Water has the power to reduce pain and thus reduce the stress caused by the pain. It is a wonderfully moisturizing liquid.

Placing common water in contact with Precious Prills causes a remarkable thinning of that water. The resultant liquid is known in nature as Dew. It is much thinner than common water, and tissues absorb it, either the moist internal tissues, or the somewhat drier tissues (skin) found on the outside of your body. Living cells that are properly hydrated have excellent dynamics, while under-hydrated cells, or perhaps even worse, over-inflated cells are extremely vulnerable to toxins and disease. Proper liquid stasis relates directly to cellular longevity, and cellular longevity relates directly to health and vitality.

When you drink Prill Water, you are getting maximum hydration, because it is being directly absorbed by your cells.

We believe that all natural water is more than H<sub>2</sub>O - two atoms of hydrogen and one atom of oxygen. There are other physical characteristics that affect our interaction with water. We have seen evidence that Life Force itself has great effect on water properties. We are able to duplicate these Life Force rich characteristics with the Precious Prills.

## **Experience Is Your Proof**

Here are a few simple ways to demonstrate the qualities of Precious Prill Water:

1. mix two cans of orange or other frozen juice of your choosing, one with Prill Water and the other with untreated water, and compare the taste.
2. set a bowl of Prill Water along side a bowl of the source water for a dog or cat and let them judge.

3. freeze some Prill Water and use it with your favorite beverage. Try a drink made with Prill ice cubes and compare it to one with ordinary ice.
4. take a couple plants and water one with your source water and another with Prill Water. This takes a bit longer, but the results will be unmistakable.
5. if you burn yourself, wet the burn with Prill Water, do this every time the pain returns and you will know for sure that you are dealing with a really great cellular moisturizer.

This list could go on for a lot longer. Use Prill Water anywhere water is normally used.

## **Laundry Appliance**

### **Save Money on Cleaning Products And Help Purify the Water of Our World**

After much testing and trial and error I have some info on my hot tub results. After my first two weeks I was having a couple problems, so I drained my water and started fresh. My water is now a full two weeks old. I have not added a chemical of any kind. I am using a Laundry Bag and two Precious Prill bags. My water is sparkling clear. My pH and alkalinity test right on the money. I have had my hot tub for four years now and I'm very fussy about my water. I've been thru a lot of trial and error working out problems and always wanted a chemical free hot tub. Well, seems to me I've found it! I'm very excited and my skin is really responding to the difference. My wife reports soft skin on her legs and feet and I have to agree they are really nice to touch. ;-)  
Scott

Cleanse our world of pollutants and save money on detergents. This Laundry Appliance creates Energized Water to clean, and it is an easy way to help clean up the waters of our world.

Anyone using Twilight America products can help to restore the quality of water on our planet.

The Laundry Appliance contains a fast acting grade of Twilight America's Precious Prills: resulting water may taste metallic. The clothes drying process allows the covering agents from commercial detergents to fall off, improving the appearance of your laundry.

#### **Directions for Use:**

Keep in an old sock will protect the casing. Let dry between uses.

#### **Washing Machine:**

Place in your washing machine with each load of laundry. Pre-treat stains as you normally would. If you still wish to

use some detergent, try only about 10%, as you may have overflowing suds.

#### **Bath Tub:**

Use in your bath to create moisturizing, healing Energized Water, to facilitate your absorption of any added minerals. Try Twilight America's Bath Crystals.

#### **Hot Tub:**

In your hot tub, instead of chlorine, use 1 to 3 Laundry Appliances, depending on the size of you tub. Add a small amount of hydrogen peroxide for odor control.

I have been using the laundry bag in our household now for 3 months. For laundry, the first batch I did was my weekly supply of bodywork sheets (I don't use oils). They came out sooooo soft and sweet I had to rewash the ones I did the previous week in regular laundry. I am slowly working my way through blankets & throws because the result is so wonderful. It does feel like being wrapped in love. I generally don't add any laundry soap but have noticed with really dirty camping clothes and towels it works better to add a little of my fav soap.

Oh, and I use the laundry bags in my hot tub, just place them in nylon stocking and hang them over the jets so when it recirculates it's awesome.  
Blessings, Sharon

## **Crystal Pearls**

Powerful Energized Water For Superior Hydration & Nutrient Delivery

Now you can instantly turn ordinary tap water into pure, energized water. Or turn your bottled water into a much superior product.

### **Superior hydration with structured and energized water.**

The Crystal Pearl creates Energized Water for superior hydration. Energized Water is efficiently absorbed at the cellular level, and this allows healing, regeneration and maintenance of living cells.

Wonderful for making plant extracts & infusions.

#### **Directions for Use:**

Drop one to eight pearls into your water, to achieve the level of taste and vitality that you desire.

### **Uses for the Crystal Pearls**

All of the Crystal Pearls are made from the same ceramic mix, and do the same job. The main difference among them is their size, which also controls their active radius, or speed. Smaller ones are more convenient, bigger ones are better for energy and body work.

The small Crystal Pearls are ideal for instant energized water in your water bottles. They are 1/2" (12 mm) in diameter and come in a pack of 8.

The medium Crystal Pearls put out more energy than the small ones, and will treat your drinking water faster, or in larger volumes, such as bath or hot tub. They are 3/4" (18 mm) in diameter and come in a pack of 4.

The large Crystal Pearls are used to energize water in larger volumes such as a bath or hot tub, or for body energy work. They are 1" (24 mm) in diameter and come in a pack of 4.

To use the large Crystal Pearls for vibrational body work, place them on any place of concern on your body; wear them in a pouch or in your pocket, taped to your skin, or to the underside of your clothes. They have a field effect in all directions, making them very effective.

I am extremely happy with the products I've been getting from you. I can only say that Jim Carter must have been a genius and his death was a loss to the world. After about 2 weeks on Prill Water and about a week on Magic Water, I suddenly noticed that my vision cleared up noticeably. It was like a gray film was lifted off my vision. Everything is brighter. My sense of smell also suddenly improved at the same time. It was not a gradual improvement, but a quantum leap. Very interesting. A definite rejuvenation effect! And fast!  
Sincerely,  
Marron

## **Shower Converter**

### **Moisturizing and Healing Water**

The Shower Converter provides energized water on-demand, a wonderfully hydrating fluid to cleanse your entire body, and improve water quality of your bath, your community and our world.

Where human skin is concerned, proper hydration is the key to health & vitality, and looking & staying young.

Since our bodies are composed mostly of water, pure moisture is essential to keep the health & vitality of your outer skin & inner cells. This water moisturizes living cells rather than passing through the body.

These converters install easily between the shower head and water pipe. A splitter can be installed to enable shower & bath use. Can also be attached to garden hose, for increased plant growth, and healthier animals. It will also help neutralize most impurities present in the city water. The Regular Converter will serve you and your family for years without maintenance.

Two Shower Converters are available, regular and chlorine removing. Chlorine removing function is provided by KDF that will become exhausted over time, reducing the converter to the regular function only.

This water may be unsuitable for drinking, as it may have a metallic taste.

<http://www.life-enthusiast.com>

I got my first order from you in record time. I am thrilled with the Twilight products, especially the Magic Water, which I made with the Crystal Pearls I got from you. My first glass blew me away. It took me 2 days to integrate all the changes! I think I'm shifting interdimensionally from my second glass ... (I'm only half kidding). I am thrilled with the pearls, finding them extraordinarily powerful, and they are certainly worth the price. (Priceless is more like it.) I will definitely be ordering more products from you. Many thanks for your great customer service and your very fast shipping. Sincerely,  
Marron
