

V600

OPERATING
&
FILTER REPLACEMENT
DIRECTIONS

TO BEGIN USING YOUR **AIRPURA**

Inspect the exterior of your Airpura to verify there is no damage from shipping. If any damage is noted, please follow the instructions from the distributor returns policy.

Wipe the unit with a damp cloth to remove any dust from packaging

Plug the unit into a regular grounded 110 volt outlet

Turn on the unit to MAX and allow it to run for a few minutes

Set the variable speed control to the level you wish

The most efficient way to use your Airpura for regular air quality maintenance is to run it at a low speed **24 hours a day 7 days a week.**

Always maintain a humidity level of 35% or less in your home to ensure the unit is operating at optimal levels. Overly humid conditions can have an adverse effect on the performance of the carbon. When using purifier with a dehumidifier, please keep dehumidifier at least 6 feet away.

FILTER MAINTENANCE AND REPLACEMENT

Ensure regular maintenance/replacement of filters

The Prefilter

Can be vacuumed from the exterior of the unit once a month or more often. Should be replaced at least after 12 months of use

To vacuum the Prefilter

Use the brush attachment on your vacuum cleaner
Vacuum slowly around the mesh surface of the filter chamber

IMPORTANT SAFETY NOTE

Please ensure air purifier is turned OFF when plugging into a power source. Failure to do so may result in motor potentially stalling and/or burning.

Poly Prefilter 600 2-pack
12 months

HEPA 600RVHU Filter
(99.97% efficient @ 0.3 Microns)
3 to 5 years

18 lbs Impregnated Carbon Filter
(17% KI/Potassium Iodide, 83%
Coconut Shell Carbon)
24 months

V614: HEPA 14 Filter
(99.99% efficient @ 0.3 Microns)

Technical specifications

Odor, airborne chemical control

18 lbs enhanced, activated carbon 13"H x 13.25"OD x 9"ID

Carbon bed

570 in² x 2 in deep

Particle removal

40 sq ft true HEPA (Measured 1 side only)
12 pleats per inch
Pleats warm rolled with separators

Air flow 560 cfm

More cfm than any other home unit available

Pre-filter

570 in² x 1 in deep

Size

23 in x 15 in

Weight

45 lbs total

Voltage options

115 or 220 volts

Watts

120 on high / 40 on low

Sound level

28.1 db on low (at 6 feet)
62.3 db on high (560 cfm)
(Room level 25.1 db)

ETL certified

Conforms to CSA C22.2
no 113 ANSI / UL 507

Air purifiers models and filter configurations

Upgrade		HEPA 14 Filter (99.99% efficient @ 0.3 Microns) ULPA Filter (99.9999% efficient @ 0.1 Microns)	18 lbs carbon filter, 17% potassium Permagnate carbon, 83% coconut shell carbon

To open the filter chamber

Turn over
the Airpura

Remove the 4
retaining screws

Take off
the cover

Remove
the gasket

Position the
Prefilter inside
the filter
chamber

Place a felt gasket at
the bottom of the
filter chamber

Unfold the filter slider
(Supplied with replacement
filters or on request
Part#6F 001)

Roll it
into a spiral

Insert the tube
into the filter
chamber inside
the Prefilter

Let the spiral
open to fill
the opening

Open the top of the
spiral to make a
slight funnel

Insert the
Carbon canister into
the funnel and hold it
straight

Let the canister
slide down
the filter slider

Pull the filter slider up
out of the cavity using
both hands and let the
canister slide to the
bottom of the cavity

Remove the filter
slider and fold it
for further use

Slide in the
Hepa filter

To close the filter chamber

Replace
the gasket

Position the
indentation in the cover
into the center of the
HEPA filter

Replace
the 4 screws
and tighten

Turn the Airpura
back on casters
