Note: A solution prepared by diluting Adya Clarity 10 mL in 1000 mL of DI water was spiked with a VOC standard at a concentration of 20 ug/L; this solution was tested as is. The solution was exposed to direct sunlight for 2 days and then filtered through the Adya Mineral Water System and tested as filtered solution. The results are summarized in the table above. After 48 hours and filtered through the Adya Water System, no Volatile Organic Compounds were detected (method detection limit = 0.5 ug/L).
